

React Training Evaluation Report

Training Duration: 5 Days

Evaluation Type: Practical + Code Review

Summary

The candidate completed the React fundamentals training tasks and submitted a Todo Application along with debugging improvements. The evaluation focuses on React fundamentals including state management, component structure, event handling, and code readability.

Evaluation Breakdown

Section	Marks Obtained	Maximum Marks
Debugging Task	18	20
Practical Todo Application	36	40
Concept Usage	19	20
Code Quality & Structure	16	20
Total	89	100

Result

Final Score: 89 / 100

Grade: Strong Understanding

Feedback

- Good understanding of React useState hook.
- Correct implementation of immutable state updates.
- Proper usage of map() for list rendering.
- Event handling implemented correctly.
- Code readability and naming conventions are good.

Suggested Improvement

The Todo application can be further improved by splitting the logic into smaller reusable components such as TodoInput, TodoList, and TodoItem to follow better component architecture.
