

React Training Plan – Week 2

Duration: 4 Days

Daily Time: 1 Hour

Goal: Strengthen React fundamentals and introduce routing, component architecture, and global state.

Day 1 – React Router

Learning Resource

Watch: React Router Tutorial – Net Ninja
https://www.youtube.com/watch?v=Law7wfdg_Is

Concepts

- Understand SPA routing
- Learn BrowserRouter, Routes, Route
- Navigation using Link

Task

- Create pages: Home, About, Contact
- Add navigation bar
- Use React Router for navigation

Day 2 – Component Architecture

Learning Resource

Watch: React Component Architecture – Web Dev Simplified
<https://www.youtube.com/watch?v=I2UBjN5ER4s>

Concepts

- Breaking UI into components
- Reusable components
- Props drilling basics

Task

- Refactor Todo App into components
- Create TodoInput component
- Create TodoList component
- Create TodoItem component

Day 3 – Context API (Global State)

Learning Resource

Watch: React Context API – Fireship
https://www.youtube.com/watch?v=5LrDIWkK_Bc

Concepts

- Understand global state
- Learn createContext and useContext
- Provider pattern

Task

- Build Dark/Light theme switcher
- Use Context to manage theme
- Access theme from multiple components

Day 4 – Mini Project

Learning Resource

Reference: Simple React Project Ideas
https://www.youtube.com/watch?v=a_7Z7C_JCyo

Concepts

- Apply concepts learned
- Practice component structure
- Use localStorage

Task

- Build Notes App or Expense Tracker
- Add item
- Delete item
- Store data in localStorage
